

How to Unlock an iPhone (Anywhere in the World)

Thursday, 04 October 2007

If you have an iPhone, can read instructions carefully and want an unlocked iPhone to work in Australia (or Europe, Asia, Africa), read the unlocking steps below to enjoy your newly unlocked Apple iPhone. ~ Warning! Please Read! ~

This is not the usual random jargon. Please read it.

If you are reading this and want your iPhone unlocked, there are some things you should know before you perform or attempt anything on this site. There are obviously risks involved - carefully consider what you are going to do - warranty may be void and you may end up with an iPhone that doesn't work. The instructions below have worked for everyone we know, but we still can't guarantee you success.

* This site is not for those uncomfortable around computers. If you aren't sure about something on here, then I recommend stopping what you are doing and wait for the actual iPhone to come out in Australia.

* You risk voiding your warranty.

* Any modifications you perform on your iPhone, including bypassing activation, will be reset if you should install a firmware update provided by Apple. It's a simple matter of redoing everything you previously did to get your iPhone back the way you had it once you update.

* Read the instructions. Read it ALL so you know what is going on.

* We are not responsible for your results if they are less than what you expected. You assume all risks.

When you are ready, then you can start liberating your iPhone !
