### US DataVault Announces Disaster Recovery Partnership with Agility Recovery

**Nashville, TN – 10AM 10 February 2015** – US DataVault, Inc. is pleased to announce they have partnered with Agility Recovery, a national leader in physical disaster recovery and business continuity solutions. This partnership will provide support to both Agility’s and US DataVault’s clients before, during and after a disaster of any type.

Following an in-depth analysis of physical disaster recovery providers, Agility’s industry-leading solution was chosen for its turn-key solution, ease of implementation and 25-year history of 100% success in recovering members. Agility’s solution provides access to the four key elements of recovery including: temporary power, access to internet and phone communications, computer and office equipment and temporary office space. Agility Recovery and US DataVault will work with each others clients to institute disaster preparedness planning and, in the event of disaster or business interruption, provide the assistance needed to regain and continue operations.

“A partnership such as this with Agility will help to ensure that US DataVault’s clients are prepared for any event,” says Bob Boyd, CEO of Agility Recovery. “We understand that organizations must be there to serve their clients – no matter the circumstances, and Agility makes that possible,” he continued.

Recovery services are not limited to the effects of a natural disaster. They can include any type of business interruption from loss of power or building fire, to burst plumbing fixtures and communications interruption.

At the time of disaster, Agility will deliver any or all of the elements of business continuity to get your operations back up and running. In addition to the physical recovery elements provided at time of disaster, Agility members are also provided access to **myAgility**, a secure online planning portal that incorporates helpful continuity planning components, as well as an Alert Notification System and cloud-based critical document storage. All employees of Agility member organizations are also provided access to **myAgility Family**, a personal & family disaster planning tool provided free of charge to each employee designed to help them become better prepared at home, and consequently more likely to return to work following an event.

“This relationship now provides Agility with the means to not only support Clients with complete “plant” setups quickly on demand in a disaster, but to also assure that when the temporary offices and equipment are in place that the Client’s data has been uploaded and is ready for their personnel to walk in, sit down and go to work immediately”, according to US DataVault’s CEO, Marc Shaffer. He goes on to say, “This relationship gives US DataVault abilities that none of its competition can even get close to; providing us with a significant competitive edge”.

Mr. Shaffer further states that; “In addition to fast system readiness, while the Client is waiting for the Agility systems to be set in place, US DataVault can have all their data systems spun up in our highly secure, cloud based virtual environment for access within an hour of our being notified, thus ensuring immediate Continuity”.

The total package of Agility and US DataVault virtually assures Clients that they will never be down for more than an hour and can be back in business totally within 48 hours MAX; and in many cases, under 24!

US DataVault’s 15 year history of never failing to restore a Client’s data and never losing or compromising a single byte of that data has made us one of the premier, independent providers of Secure, Compliant data backup, recovery and business continuity.

The proven track record of Agility has earned the company the endorsement of over 150 National & State trade associations in a variety of industries. In example, The American Hospital Association (AHA), Credit Union National Association (CUNA), Independent Community Bankers of America (ICBA), and the American Bar Association. Additionally, Agility is producing a campaign with the U.S. Small Business Administration to promote preparedness for business across the country using [www.PrepareMyBusiness.org](http://www.PrepareMyBusiness.org), a site co-developed by the SBA & Agility.

For more information on this beneficial new partnership, please contact US DataVault, Inc., (615) 977-9457 or [sales@usdatavault.com](mailto:sales@usdatavault.com)
