

DataVault

FOR IMMEDIATE RELEASE:

04-01-2016 4:55PM CST

We are pleased to announce that **USDV (US DataVault)** has been recognized for our reliability, ease of use and sterling support and was named this month as the 13th best BDR Company available for the SMB Market in North America.

This list is published monthly by Backup Review and distributed to IT and management professionals across a wide berth of industries. They have been looking at **USDV** for a long time and decided we deserved this spot.

We are committed to reaching the top 10 this year! And, with your continued support, we WILL get there!

About Backup Review:

They were established in 2004 to provide objective and timely information to buyers of on-line backup and storage services.

The on-line backup and storage industry is enjoying a rapid growth and is expected to grow along with the availability of broadband Internet for years to come. As such, there are a growing number of providers entering the market. This is great for buyers, as greater competition lowers cost and increases choice.

However, it also makes it a lot harder to choose the right provider. Backup Review helps potential users make the right choice by providing all relevant information, including monthly ranking of the top 25 providers in each of the consumer, SMB and enterprise sectors.

For those who have asked "Who is **USDV's** competition?", this is the most comprehensive list we have seen to date. Are we concerned about sharing this list with you? NO, because in our niche, we can beat them ALL!

USDV wants to be #1 and we are working hard to make it there! With your continued belief and support, we **WILL** make it!

We want to thank all of our supporters from our VARs to our Clients and friends for their part in making this possible.

Sincerely;
USDV Inc.

Marc H. Shaffer
CEO
